Employment

Cultivated Code

Junior Web Developer

June 2022 to Apr. 2023

Worked with a small remote team to develop SprintMetrics and LevelSight using Javascript, React, Tailwinds, NestJS and Express as well as confidential client work utilizing Golang, Python and Blockchain. Responsible for developing code according to the functional requirements as described by our clients.

Guillevin International

Technical Sales Representative

Calgary, AB

Jan. 2019 to Dec. 2021

Managed a Calgary client base centered around oil and gas producers, OEM fabricators, pipeline companies and EPCs to provide automation centric solutions using the Schneider, SICK and Turck products lines. Primary point of contact for PLC, sensor and software questions from the assigned customer base. Responsible for maintaining current customer revenue while finding new growth opportunities with existing and new customers.

Terago Networks

Channel Partner

Calgary, AB

Sept. 2016 to Nov. 2018

Worked with partners to provide private and public cloud solutions, colocation services and internet connectivity. Primary point of contact for partners to resolve issues as well as help them with new business development and facilitate communication with direct sales team. Responsible to maintain corporate partnership and revenue from small to mid-sized IT Managed providers.

Vanko Analytics Ltd.

Technical Sales Representative

Calgary, AB

Sept. 2012 to Nov. 2015

Managed a south east Alberta and south west Saskatchewan territory. Worked with customers to provide process instrumentation solutions to measure level, pressure, flow and fluid/gas compositions. Responsible to maintain current customer base while prospecting for new opportunities with EPC's, fabricators and end users.

Mico-Watt Control Devices

Technical Sales Representative

Calgary, AB

June 2011 to Sept. 2012

Managed a territory in south central Alberta. Worked with customers to provide instrumentation solutions centered around fire and gas detection in primarily oil and gas settings. Responsible for growing sales within assigned account base while displacing competitor offerings with potential customers.

Projects

SprintMetrics.io

June 2022 to Apr. 2023

SprintMetrics helps you run more meaningful, collaborative sprints by leveraging data and industry best practices to create accountability and momentum helping you add features, fix issues and speed time to market.

LevelSight.io

Jan. 2023 to Apr. 2023

Integration and gamification of pull requests with Slack in order to remove bottlenecks and increase team performance.

TinyApp

Feb. 2022 to Feb. 2022
